

QUICKSALES

Complete Feature Documentation

QUICKSALES - COMPLETE FEATURE DOCUMENTATION

Executive Summary

Quicksales is a comprehensive SaaS point-of-sale (POS) and inventory management system designed for multi-branch retail businesses. It provides real-time sales tracking, inventory control, staff management, and advanced analytics all in one integrated platform.

CORE FEATURES

1. DASHBOARD & ANALYTICS

- **Main Dashboard:** Real-time overview of all branches with today's sales, transaction counts, and key metrics
- **Branch Dashboard:** Individual branch performance monitoring with:
 - Total sales by branch
 - Transaction count
 - Top-selling products (pie chart)
 - High-quantity sales trends (bar chart)
 - Monthly sales data visualization (line chart)
 - Total products and categories count

Inventory status overview

Staff Dashboard: Personalized view for sales staff with their performance metrics

Real-time Metrics:

- Daily sales totals
- Transaction counts
- Profit calculations per sale

- Product performance analysis
- Branch-level comparisons

2. SALES & POS (Point of Sale)

- **Store Management:** Branch-specific sales terminals
- **Shopping Cart System:**
 - Add products to cart
 - Update quantities dynamically
 - Real-time price calculations

Modify items before checkout

Checkout Process:

- Complete sale transactions
- Automatic inventory updates
- Transaction ID generation

Final price calculation with profit tracking

Receipt Generation:

- PDF receipt generation
- Digital receipts for customers
- Receipt history for each branch

Print-ready format

Advanced Reporting:

- Export sales data to CSV
- Export profit data to CSV
- PDF sale records
- Date-range filtering
- Branch-specific reports

3. INVENTORY MANAGEMENT

- **Stock Tracking:**
 - Real-time quantity monitoring
 - Stock availability status
 - Store quantity tracking
 - Quantity sold tracking

Variance calculation (expected vs actual)

Reorder Level Management:

- Set custom reorder levels per product
- Automatic low stock detection

Reorder level per branch/product combination

Inventory Operations:

- Add inventory items
- Edit inventory details
- Delete inventory records
- Bulk inventory import via CSV

Inventory search and filtering

Restock Management:

- Track quantity restocked
- Restock history per branch
- Restock audit trail
- Update cost and sale prices during restock

4. PHYSICAL COUNT MANAGEMENT

Count Process:

- Record physical inventory counts
- Compare counted vs system quantities
- Calculate variance (shrinkage/overage)

Track count date and time

Count Records:

- Individual product count entry
- Bulk count upload via CSV
- Count history tracking

Count-specific audit reports

Count Features:

- Two-tab interface (Current Inventory + Count History)
- Record button for each product
- Modal-based entry system
- Export count data to CSV

Count timeline and history

Auto-Reset on Sale:

- Physical count automatically resets to null when item is sold
- Variance reset to 0 after sale completion
- Maintains accurate count-to-sale pipeline

5. PRODUCT MANAGEMENT

- **Product Catalog:**
- Add new products with details
- Edit product information
- Delete products
- Categorize products
- Assign product codes and batch numbers

Set profit margins

Product Details:

- Product name and code
- Category classification
- Brand information
- Unit specification
- Profit calculation

Cost price and sale price

Product Operations:

- Search products by name
- Filter by category
- Branch-specific products
- Bulk product upload via CSV

Product availability status

Multi-branch Support:

- Products available across branches
- Branch-specific pricing (optional)
- Branch-specific quantities

6. CATEGORY MANAGEMENT

- **Category Organization:**
- Create product categories
- Edit category information

- Delete categories
- Organize products by type

Category-based filtering

Category Operations:

- View products per category
- Category-level statistics
- Bulk category management

7. BRANCH MANAGEMENT

- **Branch Setup:**

- Create multiple branch locations
- Edit branch details
- Delete branch records
- Branch address and location info

Branch creation tracking

Branch Features:

- Independent inventory per branch
- Branch-specific sales records
- Staff assignment per branch
- Branch-level user access control

Branch performance analytics

Branch Dashboard:

- Today's sales by branch
- Transaction count per branch
- Branch creation date
- Clickable branch cards
- Real-time branch metrics

8. TEAM & STAFF MANAGEMENT

- **Staff Management:**

- Add team members
- Assign roles (Owner, Manager, Sales)
- Edit staff information
- Delete staff accounts

Staff invitation system

Role-Based Access Control:

- Owner role: Full system access
- Manager role: Inventory and staff management
- Sales role: POS and sales operations

Permission-based view restrictions

Staff Features:

- Generate temporary passwords
- Send staff invitation emails
- Track staff performance
- Staff assignment to branches

Activity logging per staff member

Staff Performance Tracking:

- Sales records per staff member
- Transaction history
- Commission calculation capability
- Performance reports per staff

9. AUDIT & REPORTING

- **Inventory Audit:**

- Price change tracking
- Cost and sale price history
- Audit date timestamps
- Branch-specific audit trails

Export audit data to CSV

Stock Audit:

- Restock history tracking
- Quantity changes audit
- Date and time tracking

Branch-level audit records

Sale Audit:

- Complete sale transaction history
- Sales per branch
- Sales per staff member

- Date range filtering
- CSV export functionality

Count Audit:

- Physical count records
- Count vs system variance
- Count date tracking
- Count history per product
- Bulk export capability

10. NOTIFICATIONS & ALERTS SYSTEM

- **Low Stock Alerts:**
- Real-time low stock detection
- Automatic notification creation when quantity $\leq$ reorder level
- Email alerts sent to organization owner
- One email per low stock occurrence (no spam)

HTML-formatted email notifications

Notification Features:

- Unread notification counter on bell icon
- Notification dropdown in navbar
- Notification type indicators (warning, success, error, info)
- Notification timestamp display

Mark notifications as read

Smart Resolution:

- Auto-mark notifications as read when stock is restored
- Notification persistence in database
- Notification history tracking

User-specific notifications

Email Configuration:

- SMTP integration (Zoho Mail)
- HTML email templates
- Fallback plain text emails
- Error logging and handling
- Immediate email delivery (no queue delays)

11. SUBSCRIPTION & BILLING

- **Plan Management:**

- Multiple subscription plans
- Trial period management (7-day free trial by default)
- Plan selection at registration

Monthly billing cycle

Subscription Features:

- Active subscription tracking
- Plan details display
- Subscription status monitoring
- Cancel subscription option

Subscription history

Trial System:

- Automatic trial period assignment
- Trial expiration tracking
- Upgrade prompts
- Trial-to-paid conversion

12. USER AUTHENTICATION & ORGANIZATION

- **Organization Setup:**

- Multi-tenant architecture
- Organization registration
- Custom organization branding
- Logo upload
- Brand color customization (hex color)

Business type selection

User Authentication:

- Owner registration (with organization)
- Email-based login
- Password reset functionality
- Email verification system

Session management

User Roles:

- Owner (full access)
- Manager (inventory/staff management)
- Sales (POS operations)

Role-based permission enforcement

Organization Features:

- Multi-branch support
- User limit management per plan
- Organization branding
- Organization-scoped data isolation
- Organization slug-based URL structure

13. SEARCH & FILTERING

- **Product Search:**

- Search by product name
- Filter by category
- Filter by branch
- Real-time search results

Pagination support

Inventory Search:

- Search products in inventory
- Filter by branch
- Filter by status

Sort by various fields

Sales Search:

- Search sales transactions
- Filter by date range
- Filter by branch

Filter by staff member

Advanced Filtering:

- Multi-field filtering
- Date range filtering
- Pagination (15 items per page default)
- Search within results

14. DATA EXPORT & IMPORT

- **Export Capabilities:**

- CSV export for sales data
- CSV export for profit data
- CSV export for audit records
- CSV export for count records

PDF generation for reports and receipts

- **Import Capabilities:**

- Bulk product upload
- Bulk inventory import
- Bulk count upload
- CSV format support
- Error handling and validation

15. PROFIT TRACKING & ANALYTICS

- **Profit Calculation:**

- Per-transaction profit tracking
- Profit margin visibility
- Cost vs sale price analysis
- Daily profit totals

Monthly profit trends

- **Profit Reports:**

- Export profit data by branch
- Profit visualization
- Profit per product
- Profit per staff member
- Profit analytics dashboard

16. ACTIVITY LOGGING

- **System Activity Tracking:**

- User login/logout logging
- Transaction logging
- Inventory change logging

- Staff activity tracking

Timestamp on all activities

Audit Trail:

- Complete activity history
- User-specific activity logs
- Transaction tracking
- Change history for inventory

17. ERROR MANAGEMENT

- **Error Tracking:**
- Error ticket system
- Pending error status
- Error resolution tracking
- Error logging
- Ticket creation and management

18. RESPONSIVE DESIGN

- **User Interface:**
- Bootstrap framework
- Responsive layout
- Mobile-friendly design
- Desktop optimization

Tablet support

Navigation:

- Sidebar navigation
- Top navbar
- Breadcrumb trails
- Mobile-friendly menu toggle
- Keyboard navigation support

TECHNICAL ARCHITECTURE

Backend

- **Framework:** Django (Python)
- **Database:** PostgreSQL
- **Caching:** Redis
- **Background Tasks:** Celery
- **Email:** SMTP (Zoho Mail Integration)

Frontend

- **Template Engine:** Django Templates (Jinja2)
- **CSS Framework:** Bootstrap
- **JavaScript:** Vanilla JavaScript
- **Charting:** Chart.js (for analytics)
- **PDF Generation:** xhtml2pdf

Additional Services

- **Email Service:** Zoho SMTP
- **Task Queue:** Celery with Redis
- **Session Management:** Django Sessions
- **Authentication:** Django Auth with Custom User Model

SECURITY FEATURES

- Role-based access control (RBAC)
- Organization-scoped data isolation
- Email verification
- Password reset with tokens
- Session management
- Login required decorators
- CSRF protection
- SQL injection prevention
- XSS protection through templates

SCALABILITY & PERFORMANCE

- Multi-tenant architecture
- Branch-level data isolation
- Pagination for large datasets
- Database indexing on key fields
- Async task processing with Celery
- Redis caching support
- User limit enforcement per plan

API & INTEGRATIONS

- JSON API for data operations
- CSV import/export functionality
- Email integration
- Payment processing ready (Paystack integration present)
- Third-party SMTP integration

SUMMARY

Quicksales is a feature-rich, enterprise-grade retail management system that handles: - Multi-branch POS operations - Real-time inventory tracking - Staff management with role-based access - Comprehensive reporting and analytics - Automatic low stock alerting with email notifications - Physical inventory counting - Profit tracking and analysis - Subscription-based billing

The platform is designed for scalability, security, and ease of use, making it suitable for retail chains, grocery stores, pharmacies, and other retail businesses of various sizes.
